Subject: GLYPHOSATE NSRL
Date: Saturday, June 03, 2017 4:40:01 PM

I/We request that the Prop 65 NSRL (No Significant Risk Level) for glyphosate must be a validly arrived at NSRL, per CA regulations, substantially lower than the proposed 1100 micrograms per day, in order for this Safe Harbor to actually be safe to Californians. Until a comprehensive independent study is done, showing real life exposure levels, regulatory authorities should use a NSRL of well below 0.0001 micrograms/day,(Thongprakaisang et al., 2013), the level where breast cancer has been detected, in keeping with The Precautionary Principle. THANK YOU , LISA GOLDEN WINDSOR, CALIF. 95492
